

Our instructors will help you become
YOUR OWN BEST TEACHER.

Our sole focus is teaching you to improve your entire golf game, from tee to green. Our instructors evaluate your game and tailor our instruction to meet your needs.

At the core of our practical approach is the principle of ball flight analysis. You will learn how to examine your ball flight and be able to apply that knowledge to become a more consistent player.

Whether you are a club champion, a recreational player with family or friends, a participant in occasional business outings, or a brand new golfer, the Jacobs' Golf approach will lower your scores.
